### VX1800 End of Life Notification

This is the End of Life announcement for the VX1800 Session Border Controller and Gateway products. The VX1800 EOL is because of component obsolescence and the lack of ROHS-2 certification for European Union countries. In many accounts, the VX1800 can be replaced by the SBC 2000. This product scales to 16 T1/E1 ports and can handle up to 600 SRTP sessions.

**Please Note** Sonus has limited quantities available of the VX1800, so please check availability before committing to a customer. We put some stock of VX1800's into the EU in December of 2012 for shipment, but quantities are limited.

VX1800's cannot be shipped to any EU country as of January 1<sup>st</sup>, 2013.

The product codes that will no longer be available are listed below
