

Trunking and Access Release 7 End of Product Sale Product Matrix

Summary

This document lists Sonus Trunking and Access products that, due to the inclusion of Release 7 (R7) software, are subject to a reduced period of availability and support.

Please note this document does **not** list all products that are affected by the R7 End of Product Sale. For example, there are many trunking products which are currently executing R7 software but were originally acquired without Release 7 software “on-board”. These trunking products will be subject to a bounded period of reduced Release 7 software support, as defined in the Trunking and Access Release 7 End of Product Sale Notification document.

Definitions

End of Product Sale Notification: Date that Sonus issued the Trunking and Access Release 7 End of Product Sale Notification regarding reduced availability and end of service dates.

Last Order Date: The last date to order R7 products through Sonus point-of-sale mechanisms. The products are no longer for sale after this date.

End of Service Life Date: Date that Sonus Customer Service discontinues software support for the Release 7 product.

Table One:
